

Assistive Technology 2023 Gift Guide

Assistive devices not only help older adults and people with disabilities be more independent and stay connected with family and friends, but they also make great gifts! Our assistive technology team can help you learn more about the items below and other types of devices and services available.

 Look for the package icon to see new items in the 2023 guide!

To find out about the items shown here or other technology devices and training that may help the people you care about, contact **WellWise Services** at **517-592-1974** or email us at: **info@wellwiseservices.org**.

[Smart Speakers](#) are still at the top of the list because they can do so many things, can be used by people with a wide range of abilities, and fit in almost every category below.

Devices such as the Amazon Echo (Alexa) and Google Home can be used hands-free for home control of TV, lights, and door locks, to update shopping lists, listen to news, weather and music, make phone calls, provide reminders, and many more tasks. These require Wi-Fi in the home and a smart phone or tablet at set-up.

For people who already have a smart speaker, there are many companion items including light control modules, thermostats, a mailbox sensor, and music and audio book subscriptions.

Amazon Show smart speaker

Wheelchair accessible fishing pier

Communication/Isolation

 [Explore Accessible Recreation](#) Take a day trip to local Michigan and county parks that provide a wide variety of accessible recreation opportunities including track chairs, accessible trails, and boat launches.

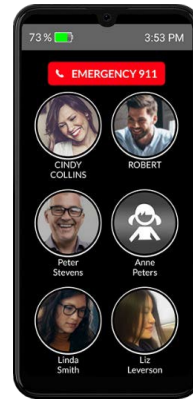

[ElliQ](#) A smart "robot" companion designed to initiate interactions and engage with seniors living independently at home.

[RAZ Memory Cell Phone](#) Picture-based phone shows a limited set of people who can be called with only one touch. The display is always on to make dialing easier. Care givers can configure it remotely and limit who calls in to help avoid scams.

[Snug Safe](#) A daily check-in app for people living alone.

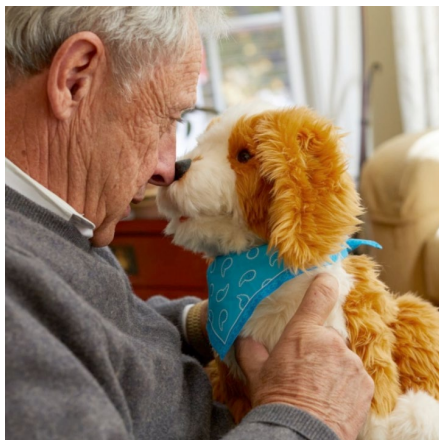

ElliQ

RAZ Memory Cell Phone

[Alexa Together](#) A remote care giving service for Alexa smart speaker users that includes 24/7 response, customized alerts, and interaction reports.

[Companion Pet](#) Realistic pets respond to petting, hugging, and motion with purrs, barks, and wagging tails.

Companion Pet

Dining Scarf

Dressing/Personal Care

 [Bidet Seat](#) A bidet attachment reduces the need to twist and reach reducing the chance of injury or losing balance and is a gentle way to clean delicate skin.

[Flexible Long Handle Shoehorn](#) Assists with putting on and taking off shoes without excessive bending.

 [Dining Scarf](#) A dignified alternative to bibs for adults needing a little extra protection for their clothing while dining.

[Combination Button/Zipper Pull](#) Wide grip dressing aid for people with limited dexterity.

Memory/Reminders

[HiFutureSelf App](#) Send scheduled texts to yourself (or a person you care for) with one-time or repeating reminders or location-based messages.

[Tile](#) Trackers in a variety of sizes to help find misplaced items.

[Doorknob Organizer](#) Hangs from the door handle to hold items you need to remember to take when leaving home.

Tile

Doorknob Organizer

[Pillsy](#) Wi-Fi connected medication bottle gives alerts when a dose is due, double dose alerts, and history of when medications were taken. It will send a reminder to your or a caregiver's phone.

Mobility Assistance

 [Walking Poles](#) Enable many walkers to improve balance and go farther by spreading their weight to alleviate pressure on leg joints.

[Stedi-Two](#) A glove designed to significantly reduce essential tremors in the wrist and forearm.

 [Car Assist Handle](#) Provides stabilizing support to assist when exiting or entering a car.

Walking Poles

Car Assist Handle

[Seat Belt Grabber Handle](#) Reduces twisting needed to grab and pull a car seat belt into position.

Cooking

 [Stove Reminder](#) Replaces knobs on a gas or electric stove and emits audio and visual alerts while burners are on. Can connect to Alexa to send you a text reminder your stove is on.

[Uccello Electric Safety Kettle](#) A stand-alone kettle and tipper provides a safe way to heat and pour water for people with reduced strength and mobility.

[Induction Cooktop](#) A cooking surface that doesn't get hot, can include auto shut off, and can be placed anywhere to make reaching the controls and pan easier.

Safety Kettle

Induction Cooktop

Hearing

[Wireless TV Headphones](#) Works with most audio devices to allow the user to increase volume and reduce external noises without disturbing others.

[Ear Machine](#) Smartphone app amplifies and enhances conversation, music, calls, and outside noises for people with hearing loss.

Vision

[IPEVO Camera](#) Table-top magnifying cameras that can be used to read mail and other documents, perform personal care tasks, and help other close-up activities or distance viewing. Used with a computer monitor, tablet, or TV to show the images.

[Portable Magnifiers](#) A variety of handheld or wearable magnifiers in a range of sizes and configurations exist for many different users and uses.

IPEVO Camera

Rotating Cleaning Brush

[Seeing AI](#) A smartphone app with multiple features to assist people with low vision.

[BARD Mobile](#) An app to provide free audio and Braille reading materials to people who cannot read standard print.

General

 [Wireless Rotating Cleaning Brush](#) A lightweight, surface cleaner to save time and energy and reduce the need to bend and reach.

[Cell Phone Grip with Card Wallet](#) Helps hold on to cell phones and tablets and includes a space for money or cards.

[SwitchBot Curtain](#) Allows curtains to be opened and closed remotely using a phone app, a wireless button, smart speaker, or schedule.

SwitchBot Curtain

Cell Phone Grip

[Consultation and/or training with an AT provider](#) Still not sure about the best solution? Will the user need help setting up and learning to use the item? An evaluation or training session with an assistive technology professional can help you select the right devices and other methods to address specific needs. A professional can help the recipient learn how to use their new devices or better access and take advantage of features on the devices they already own. A gift certificate for an on-line or in-person appointment is sure to be the right size for anyone.

The items shown above are good examples of helpful devices, but they are only a small part of the assistive technologies available. This list is not an endorsement of any products or vendors and WellWise Services does not sell or receive any compensation for these items. None of the items shown will work for everyone. Some of the items require Wi-Fi, training, set up, or maintenance to be used safely and effectively. Please be sure to understand the needs of the user and limitations and requirements of each device before making a purchase.
